

The Tabs maintain standard  
Rollover behavior

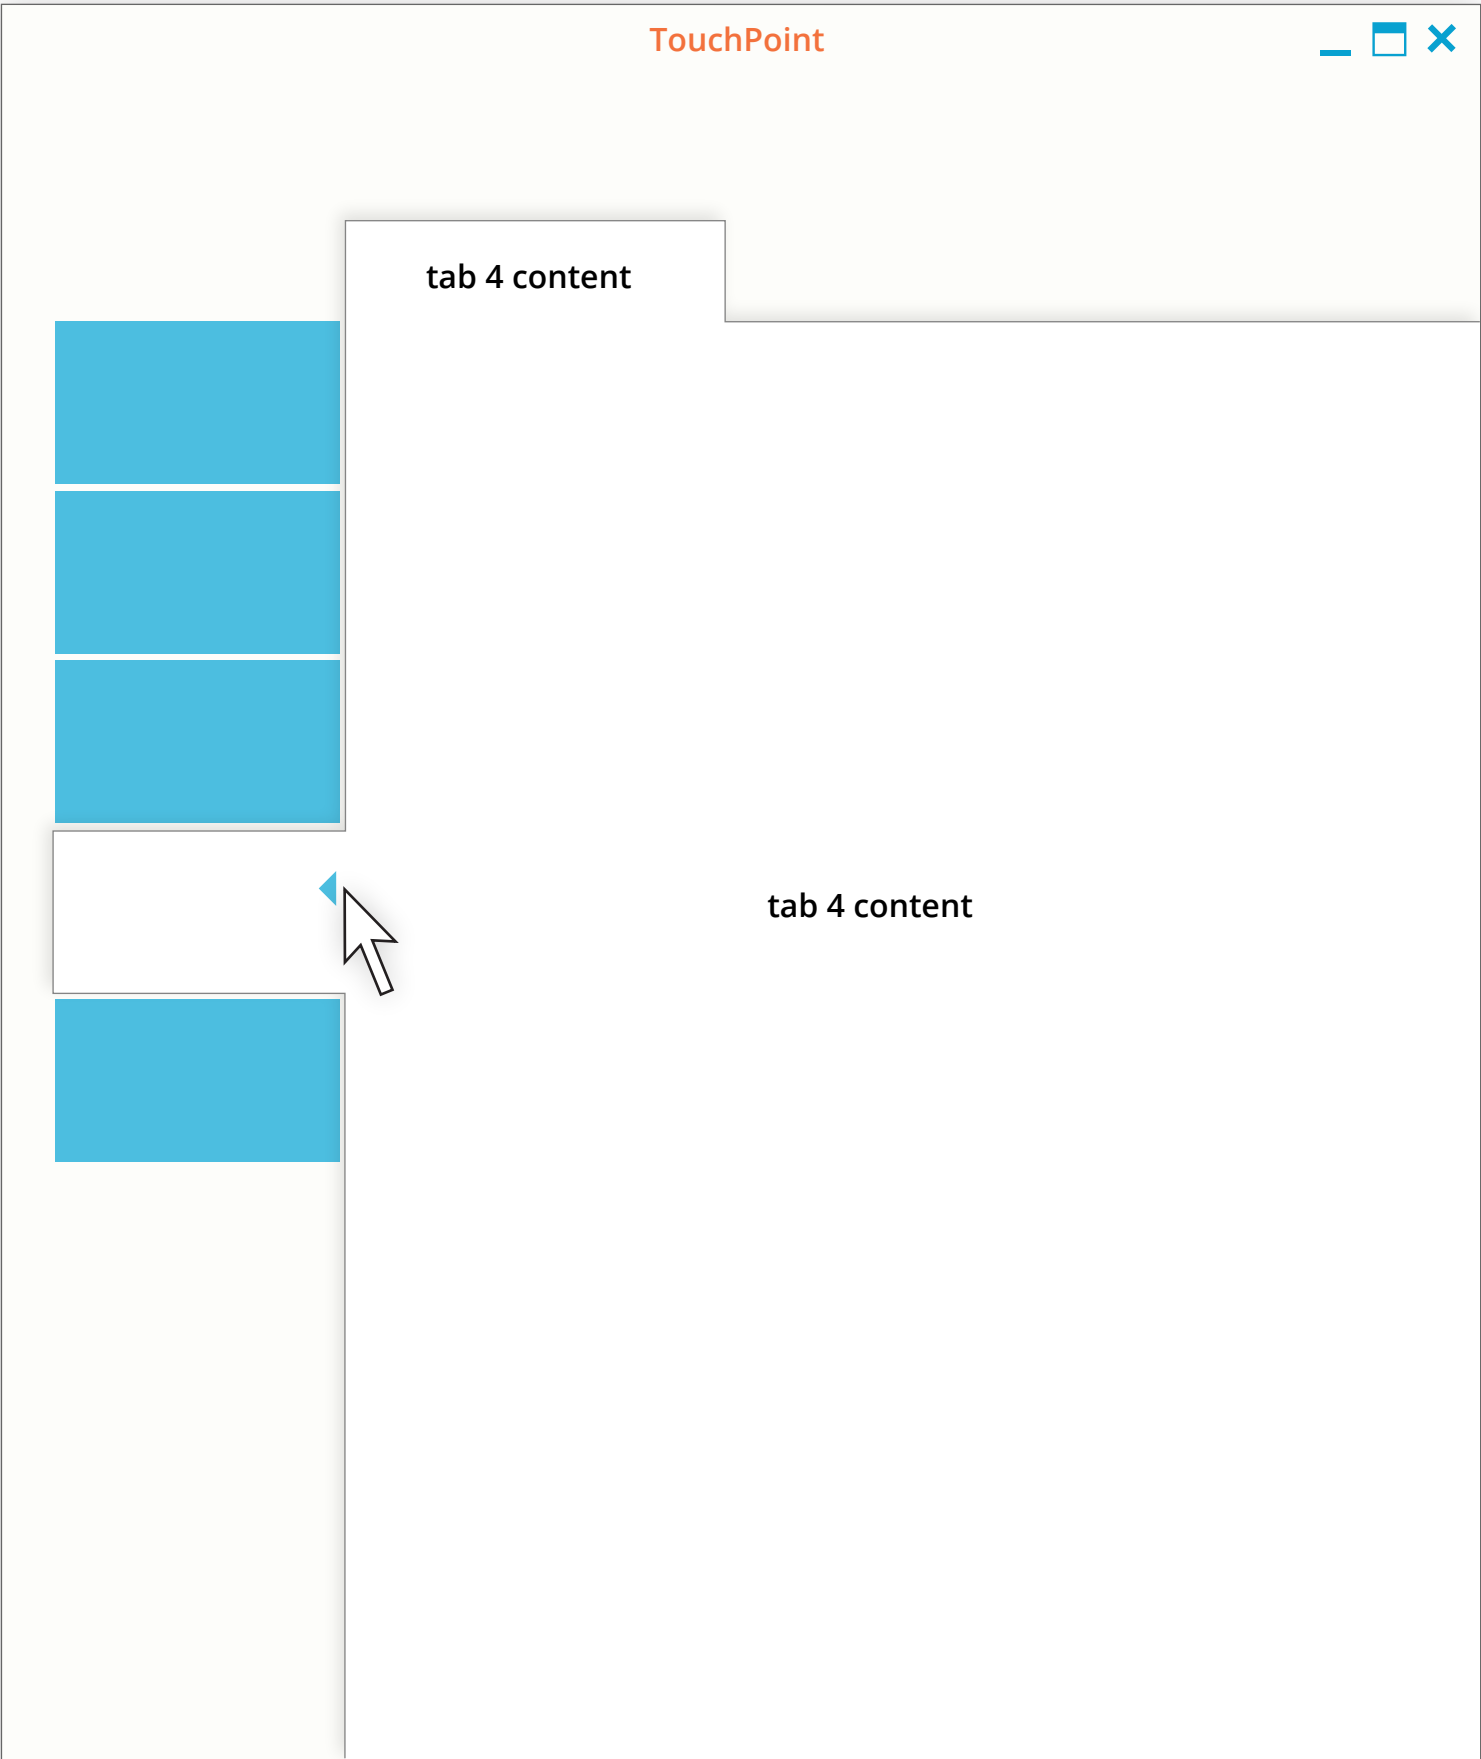

In collapsed mode, clicking on the 4th Tab will change the panel contents to show content represented by the 4th Tab.

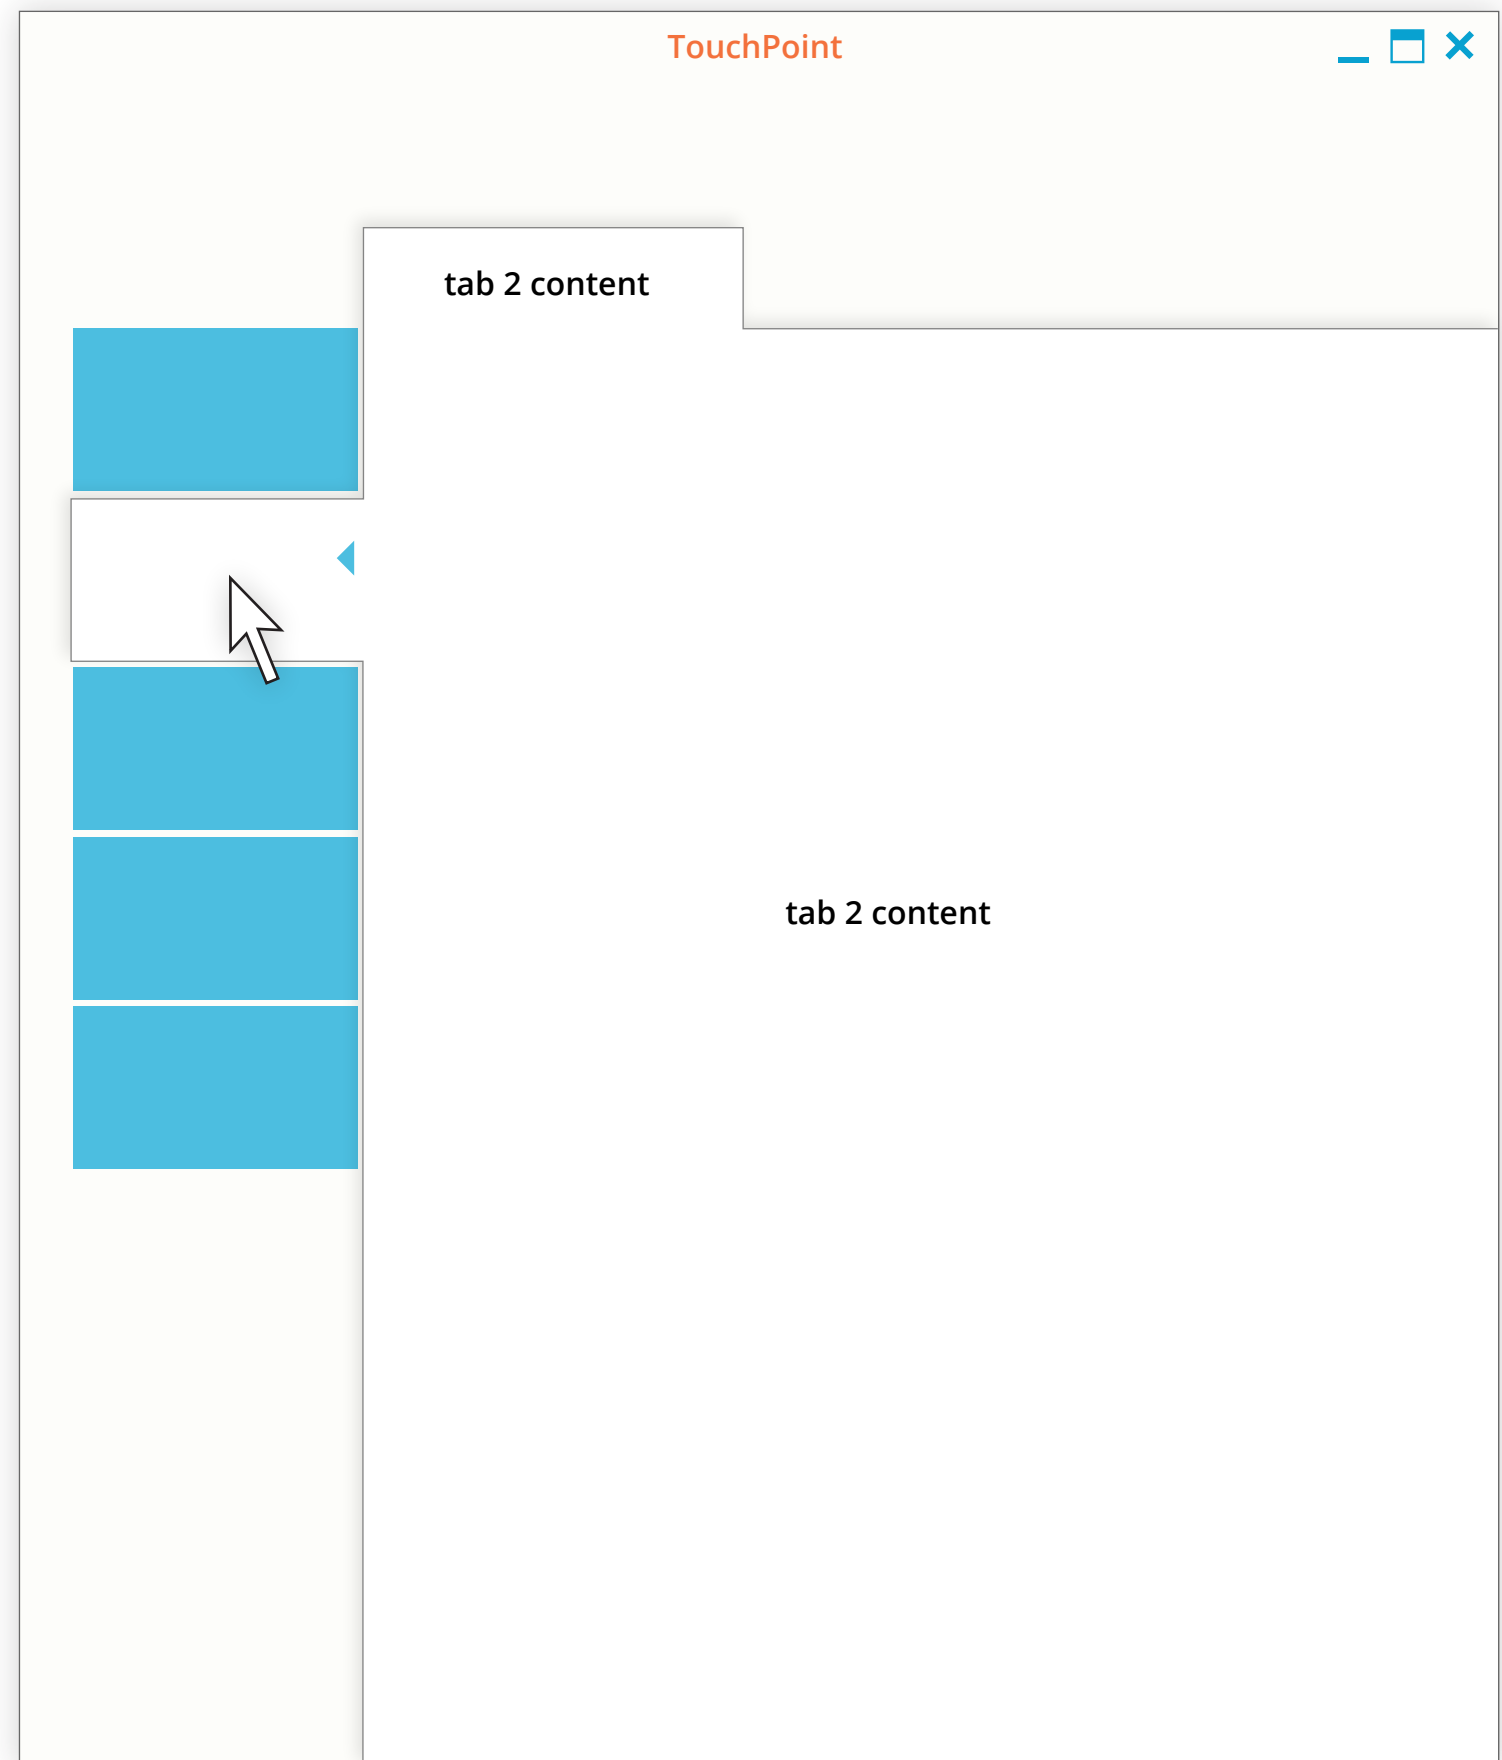

The Thin Tab view can be changed to a Full Tab view by clicking on the Arrow on the in focus Tab.

The Contents panel will transition to a narrower view to allow the tabs to be shown in full.

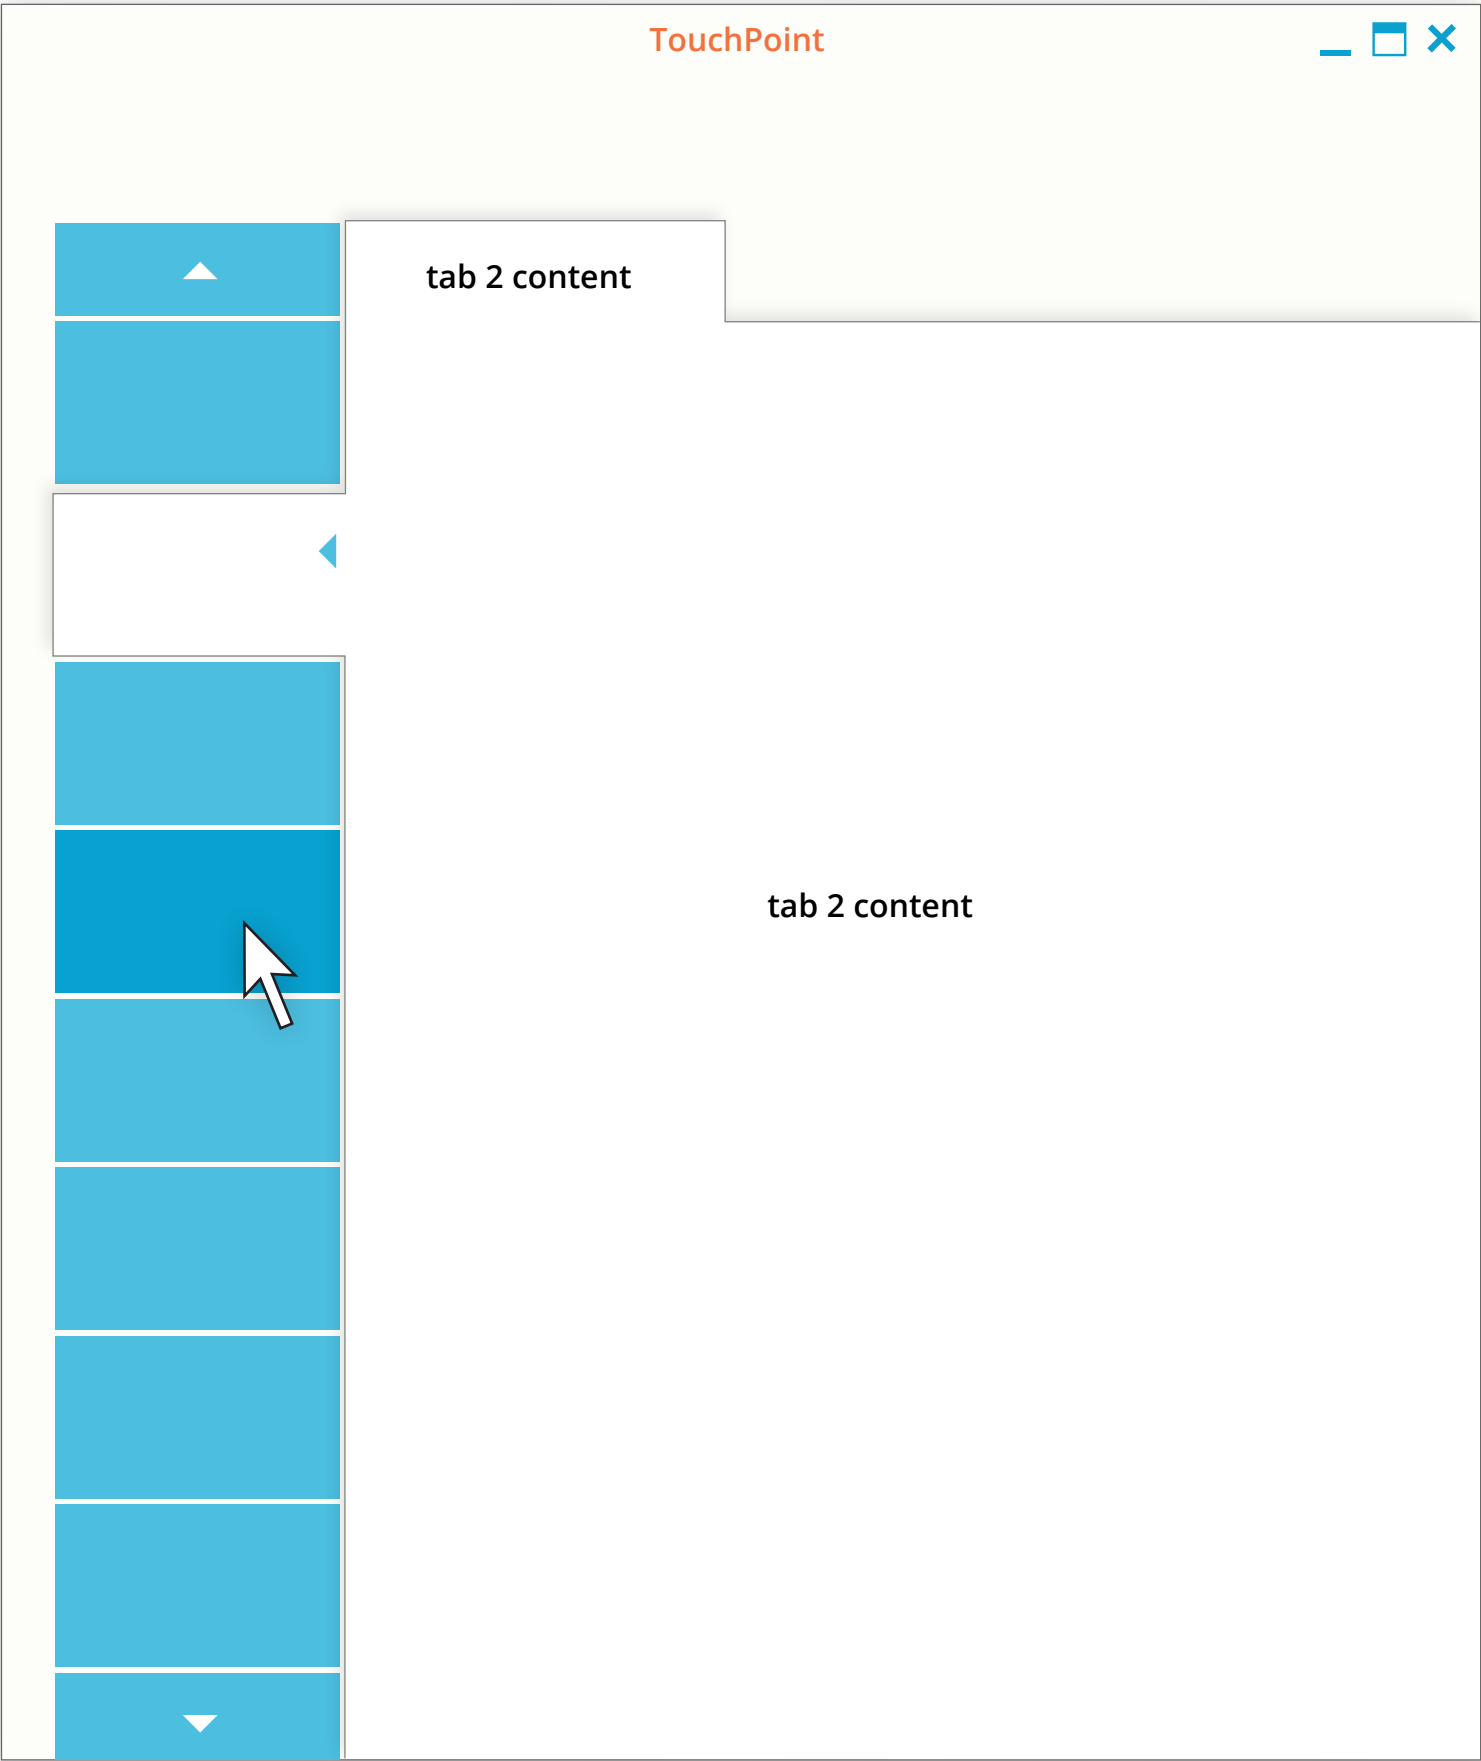

Clicking on another tab will swap the page display to the contents represented by the relevant tab.

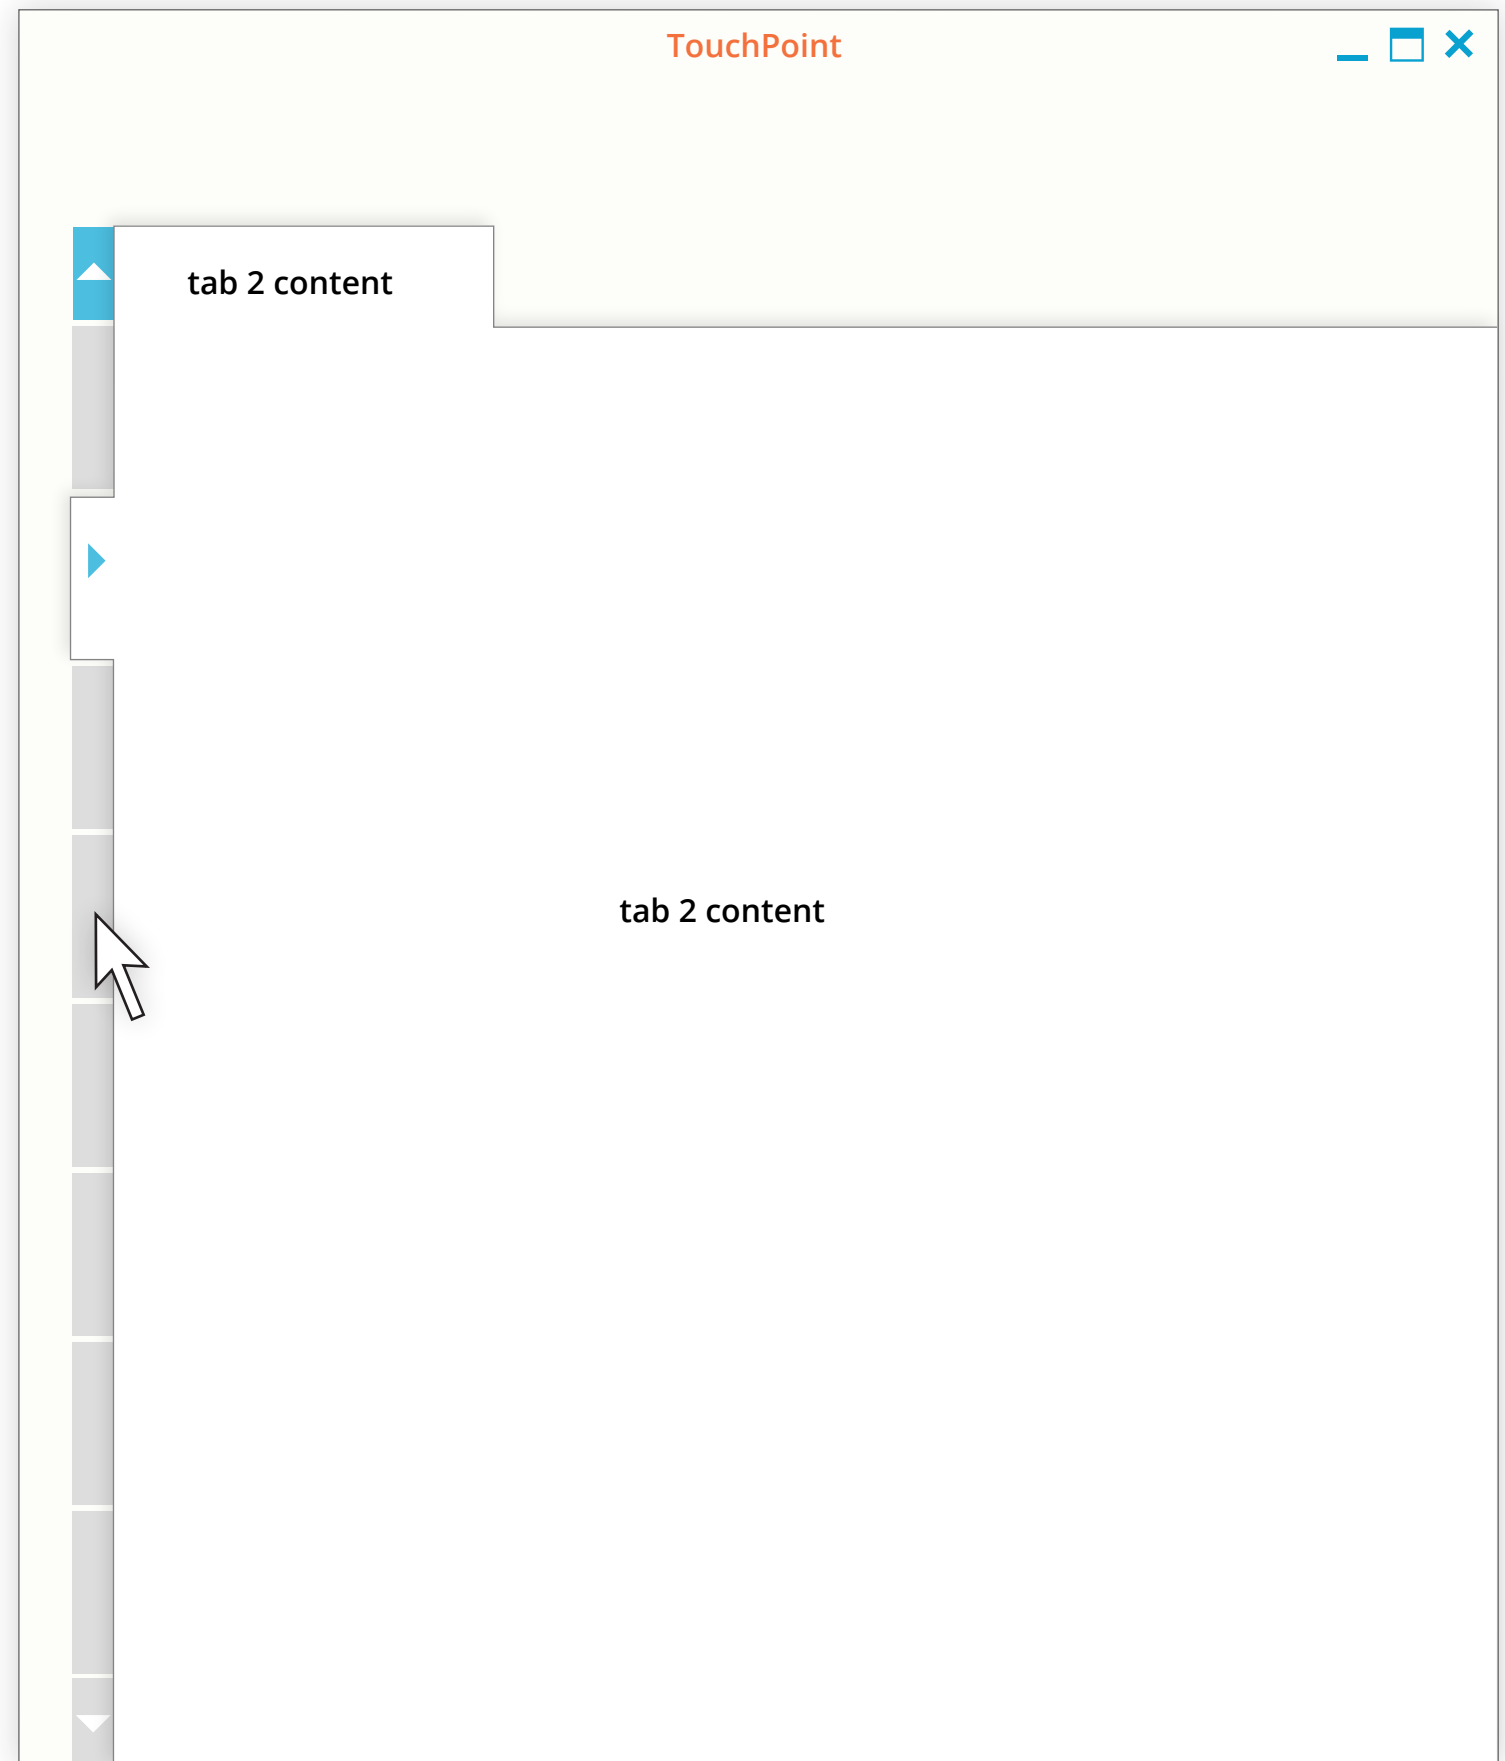

The full tab view will not change until the arrow on the in focus tab has been clicked.

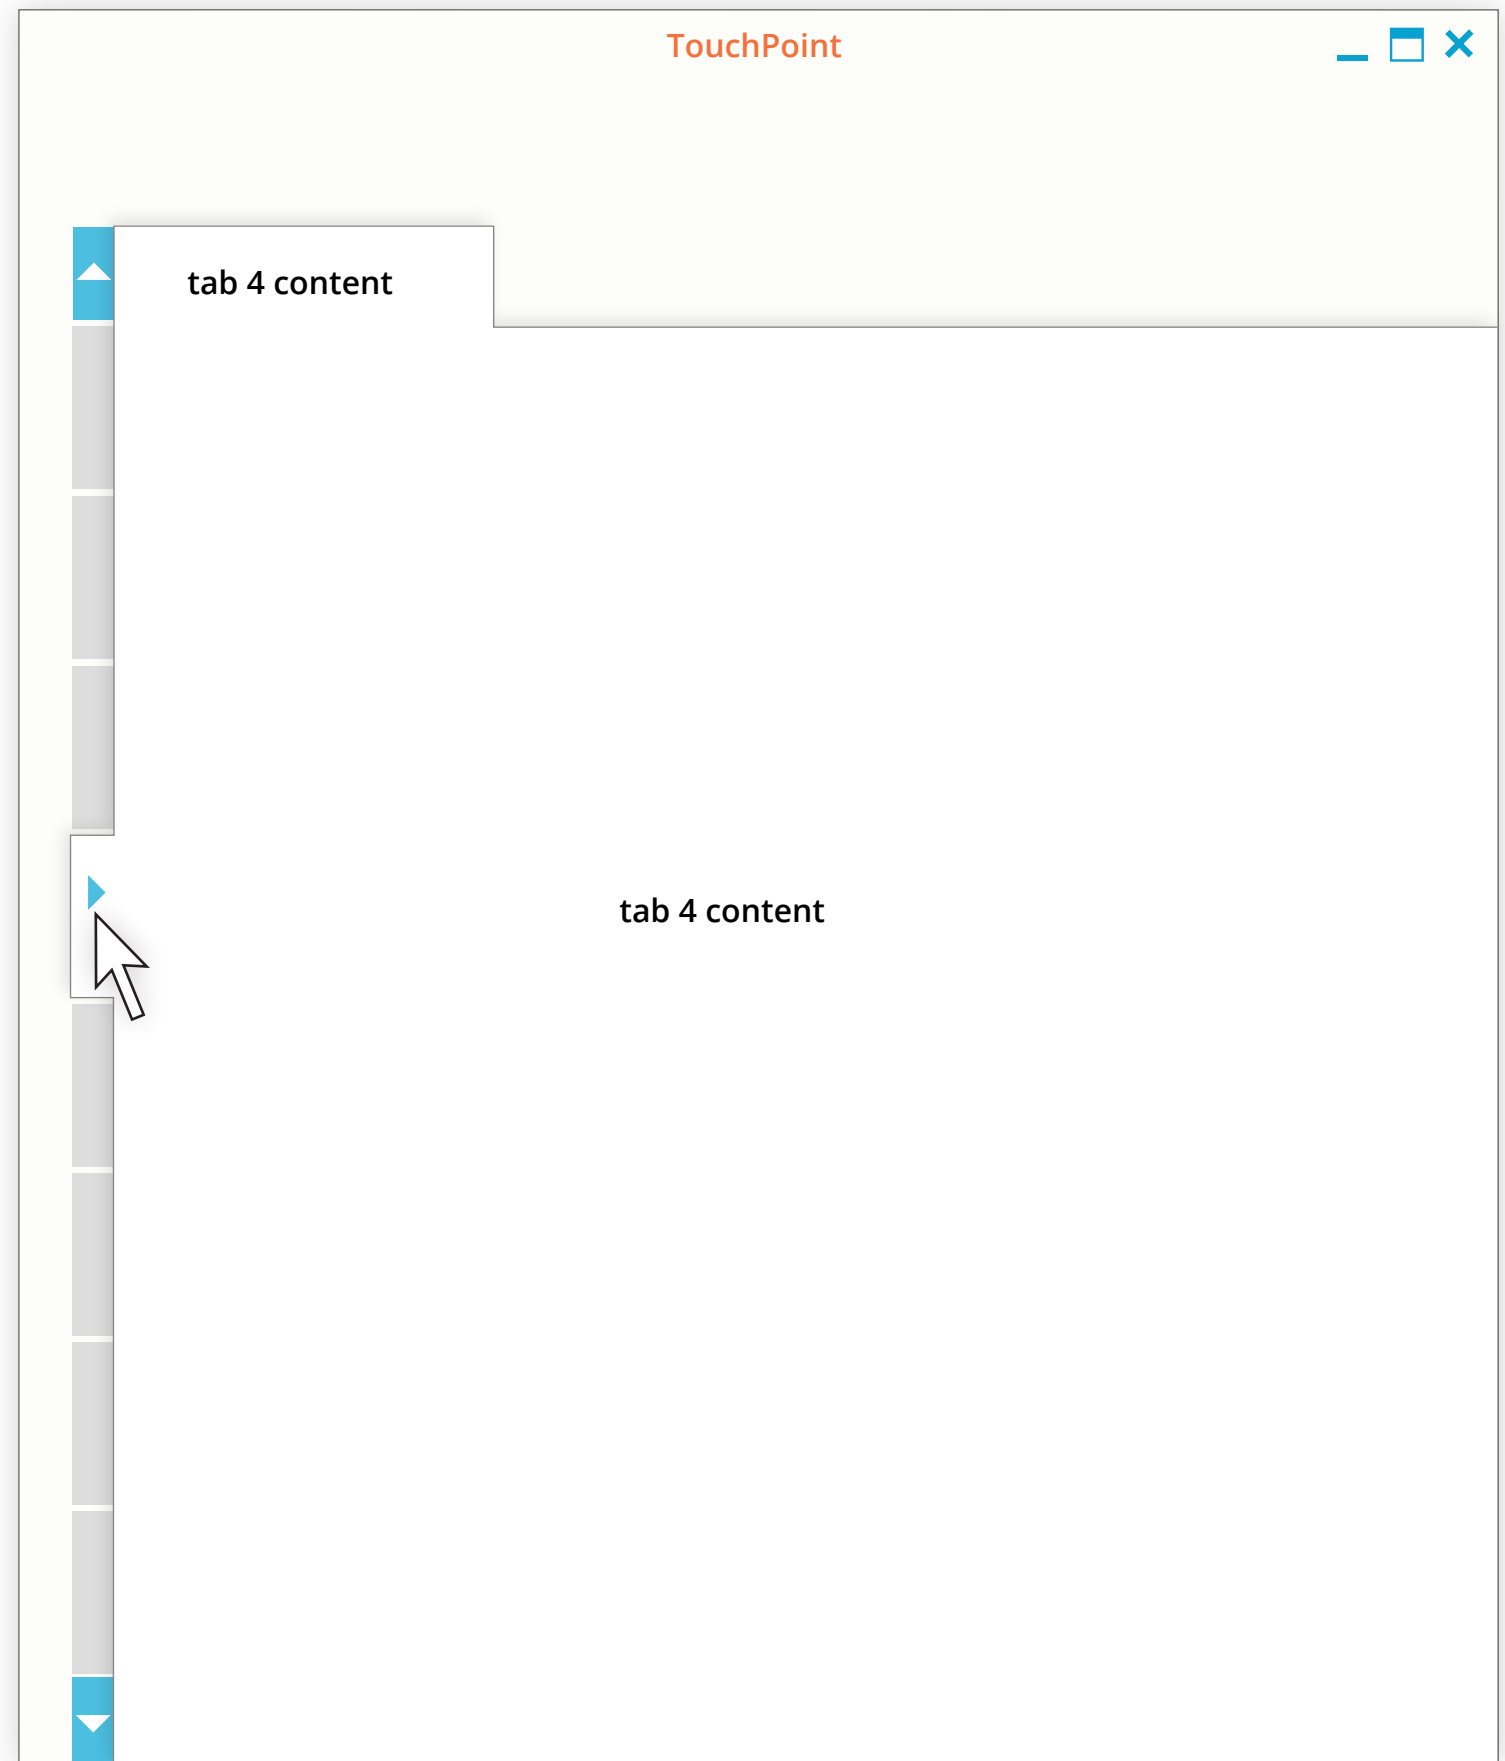

In the case of too many tabs being open to all be shown on one page. Scroll arrows are shown above and below the list of tabs.

Rollover is as the current app.

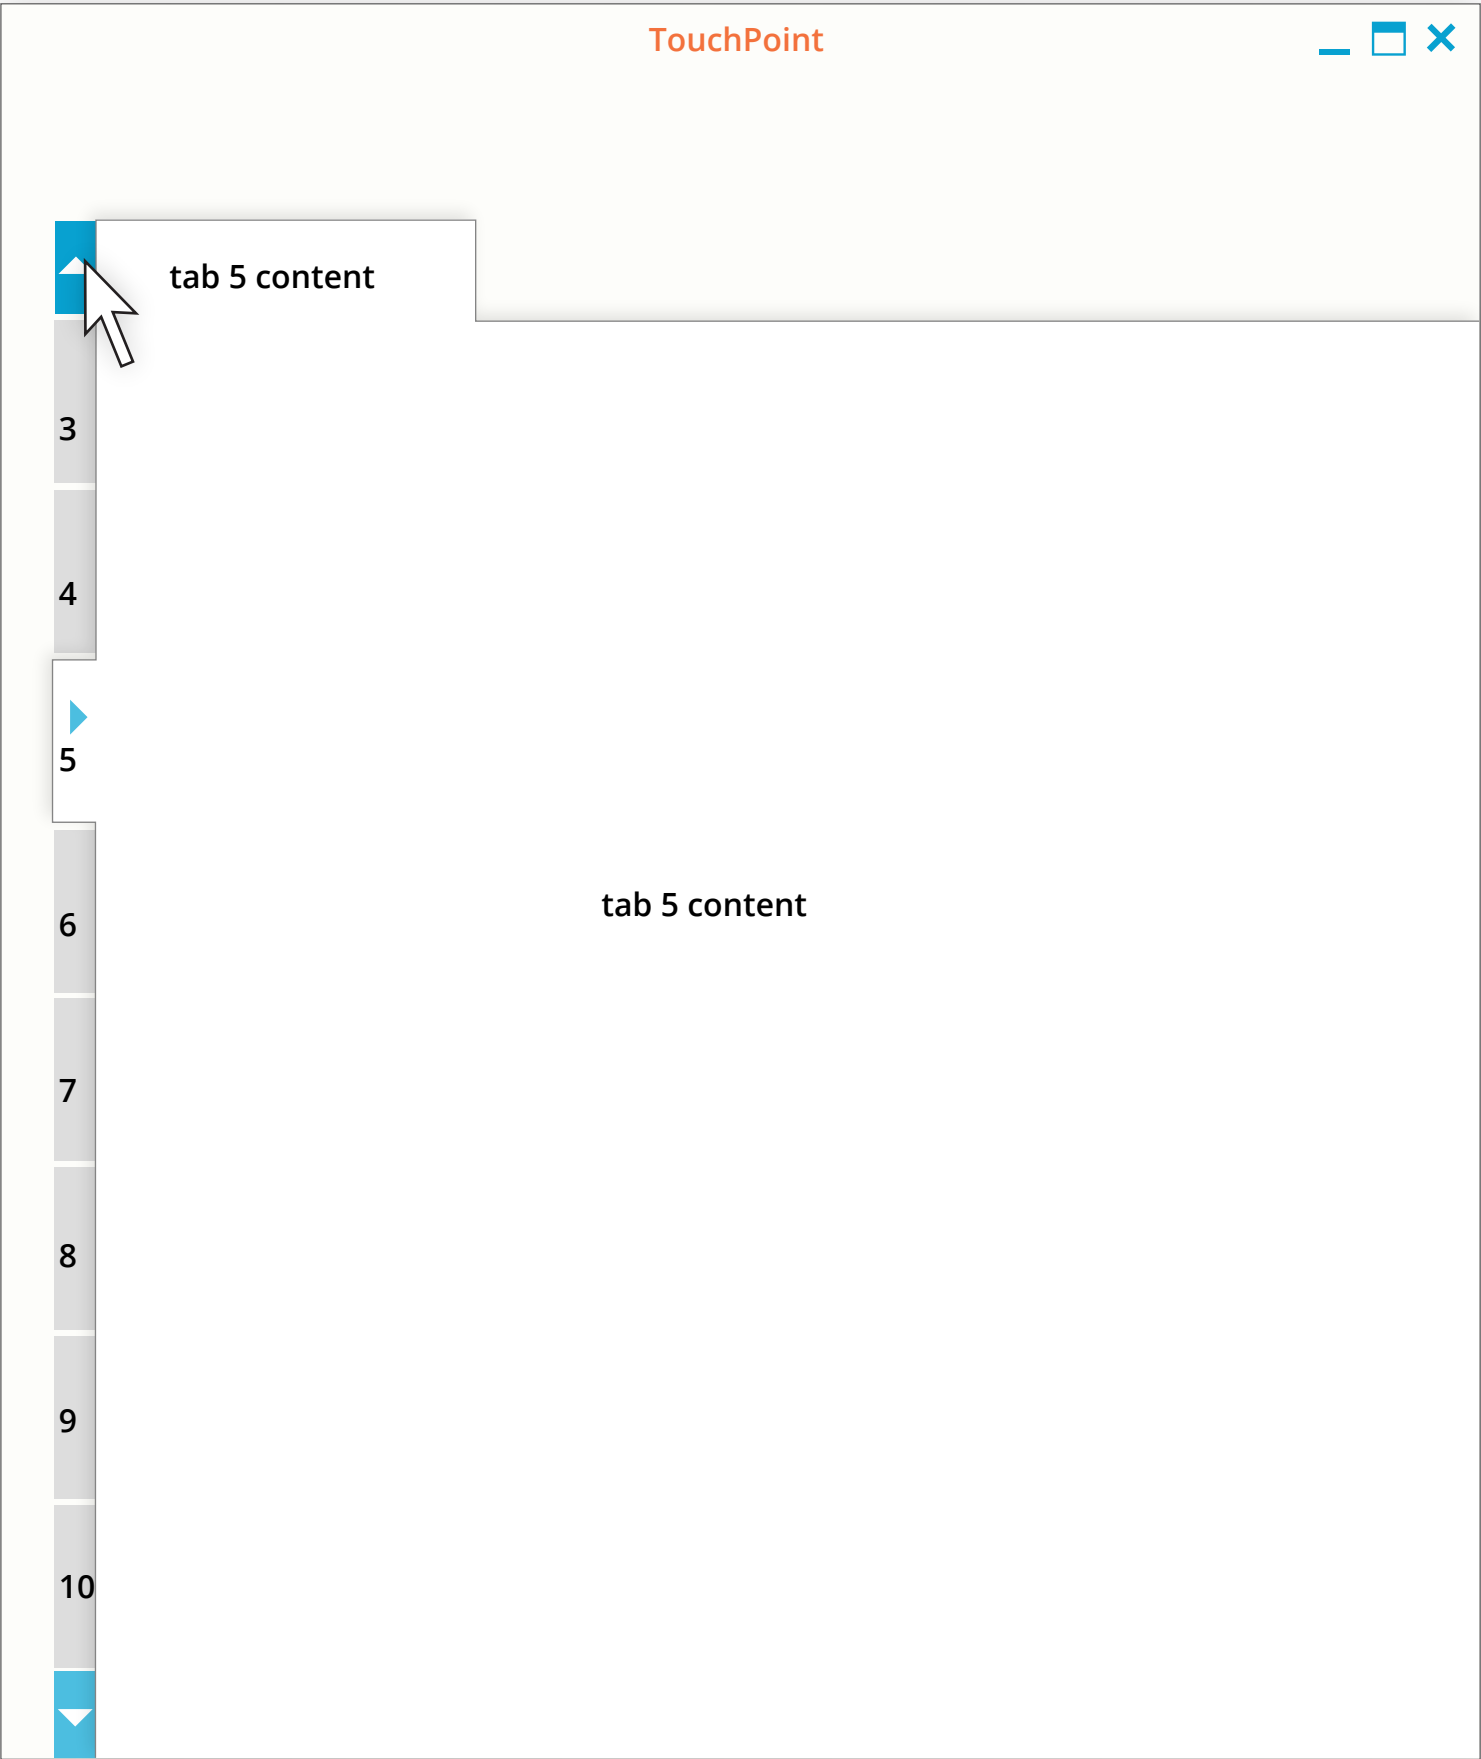

Clicking the Up Arrow will bring to focus the tab above the current selected tab.

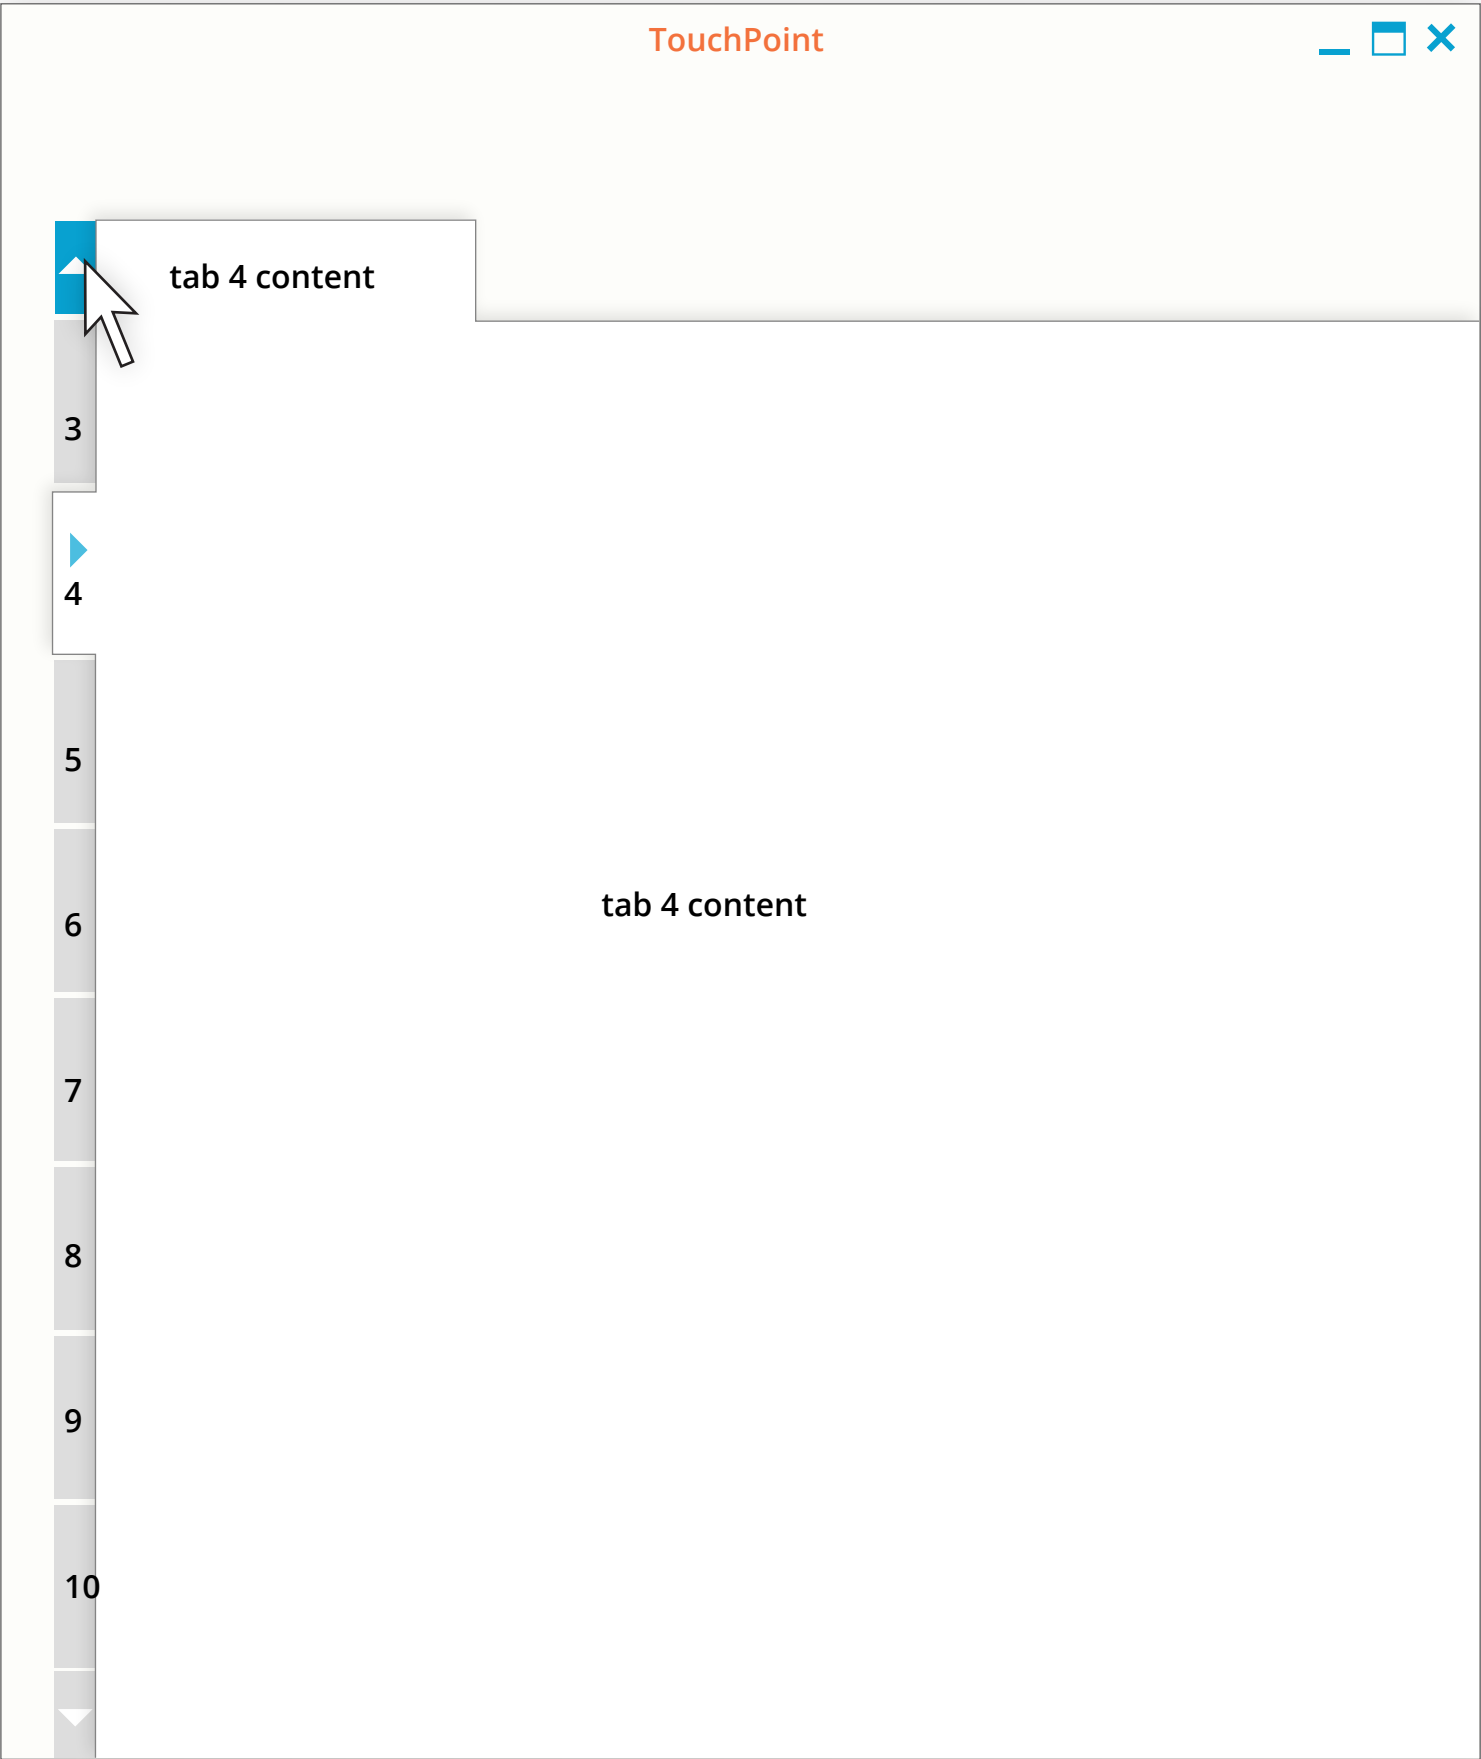

The contents of the page will change to show content represented by the newly focussed tab

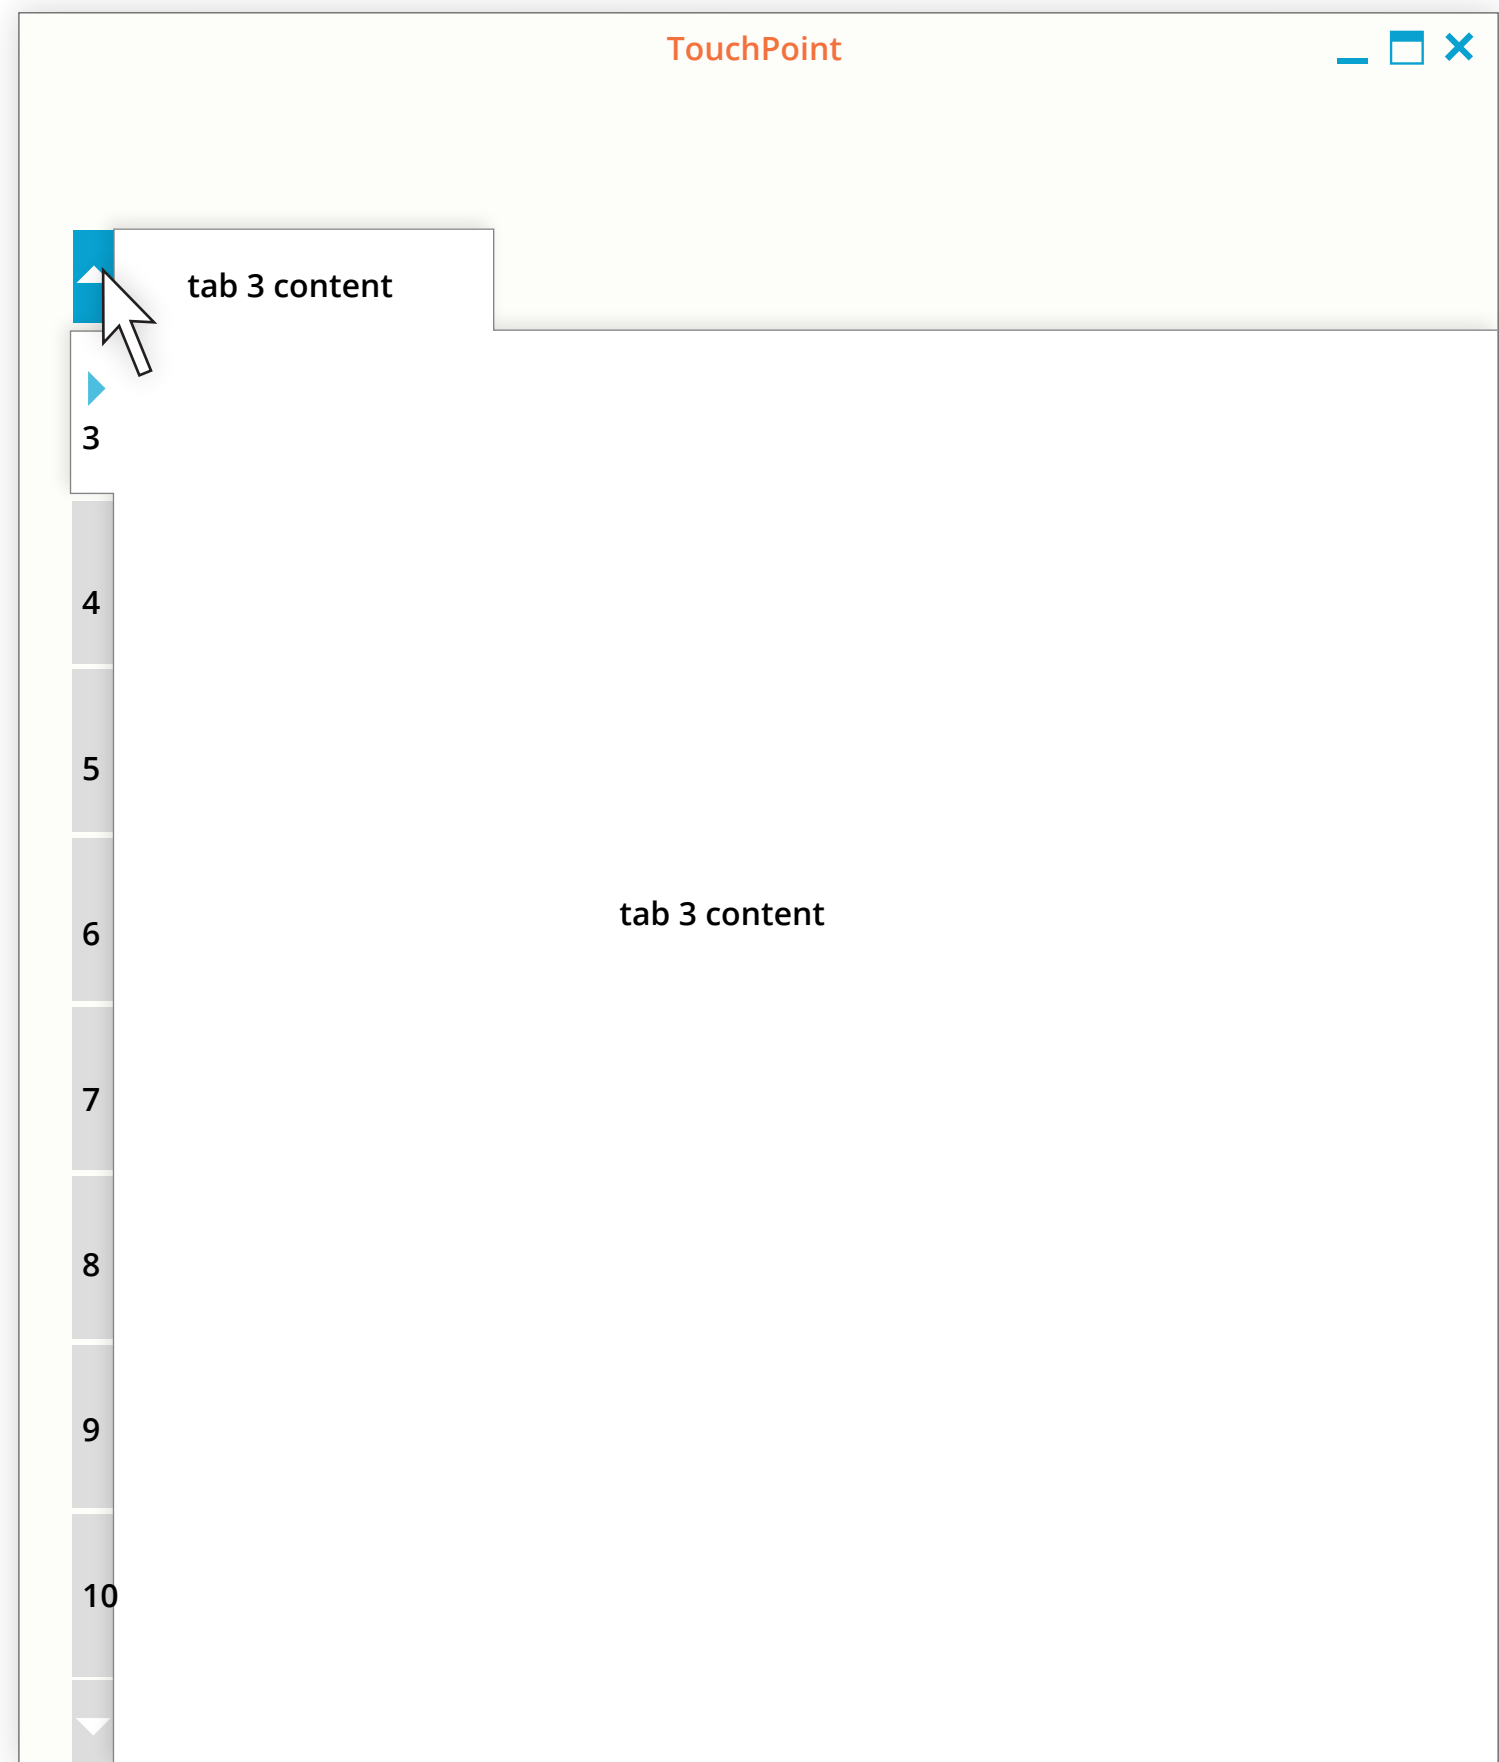

Clicking the Up Arrow will bring to focus the tab above the current selected tab.

The contents of the page will change to show content represented by the newly focussed tab

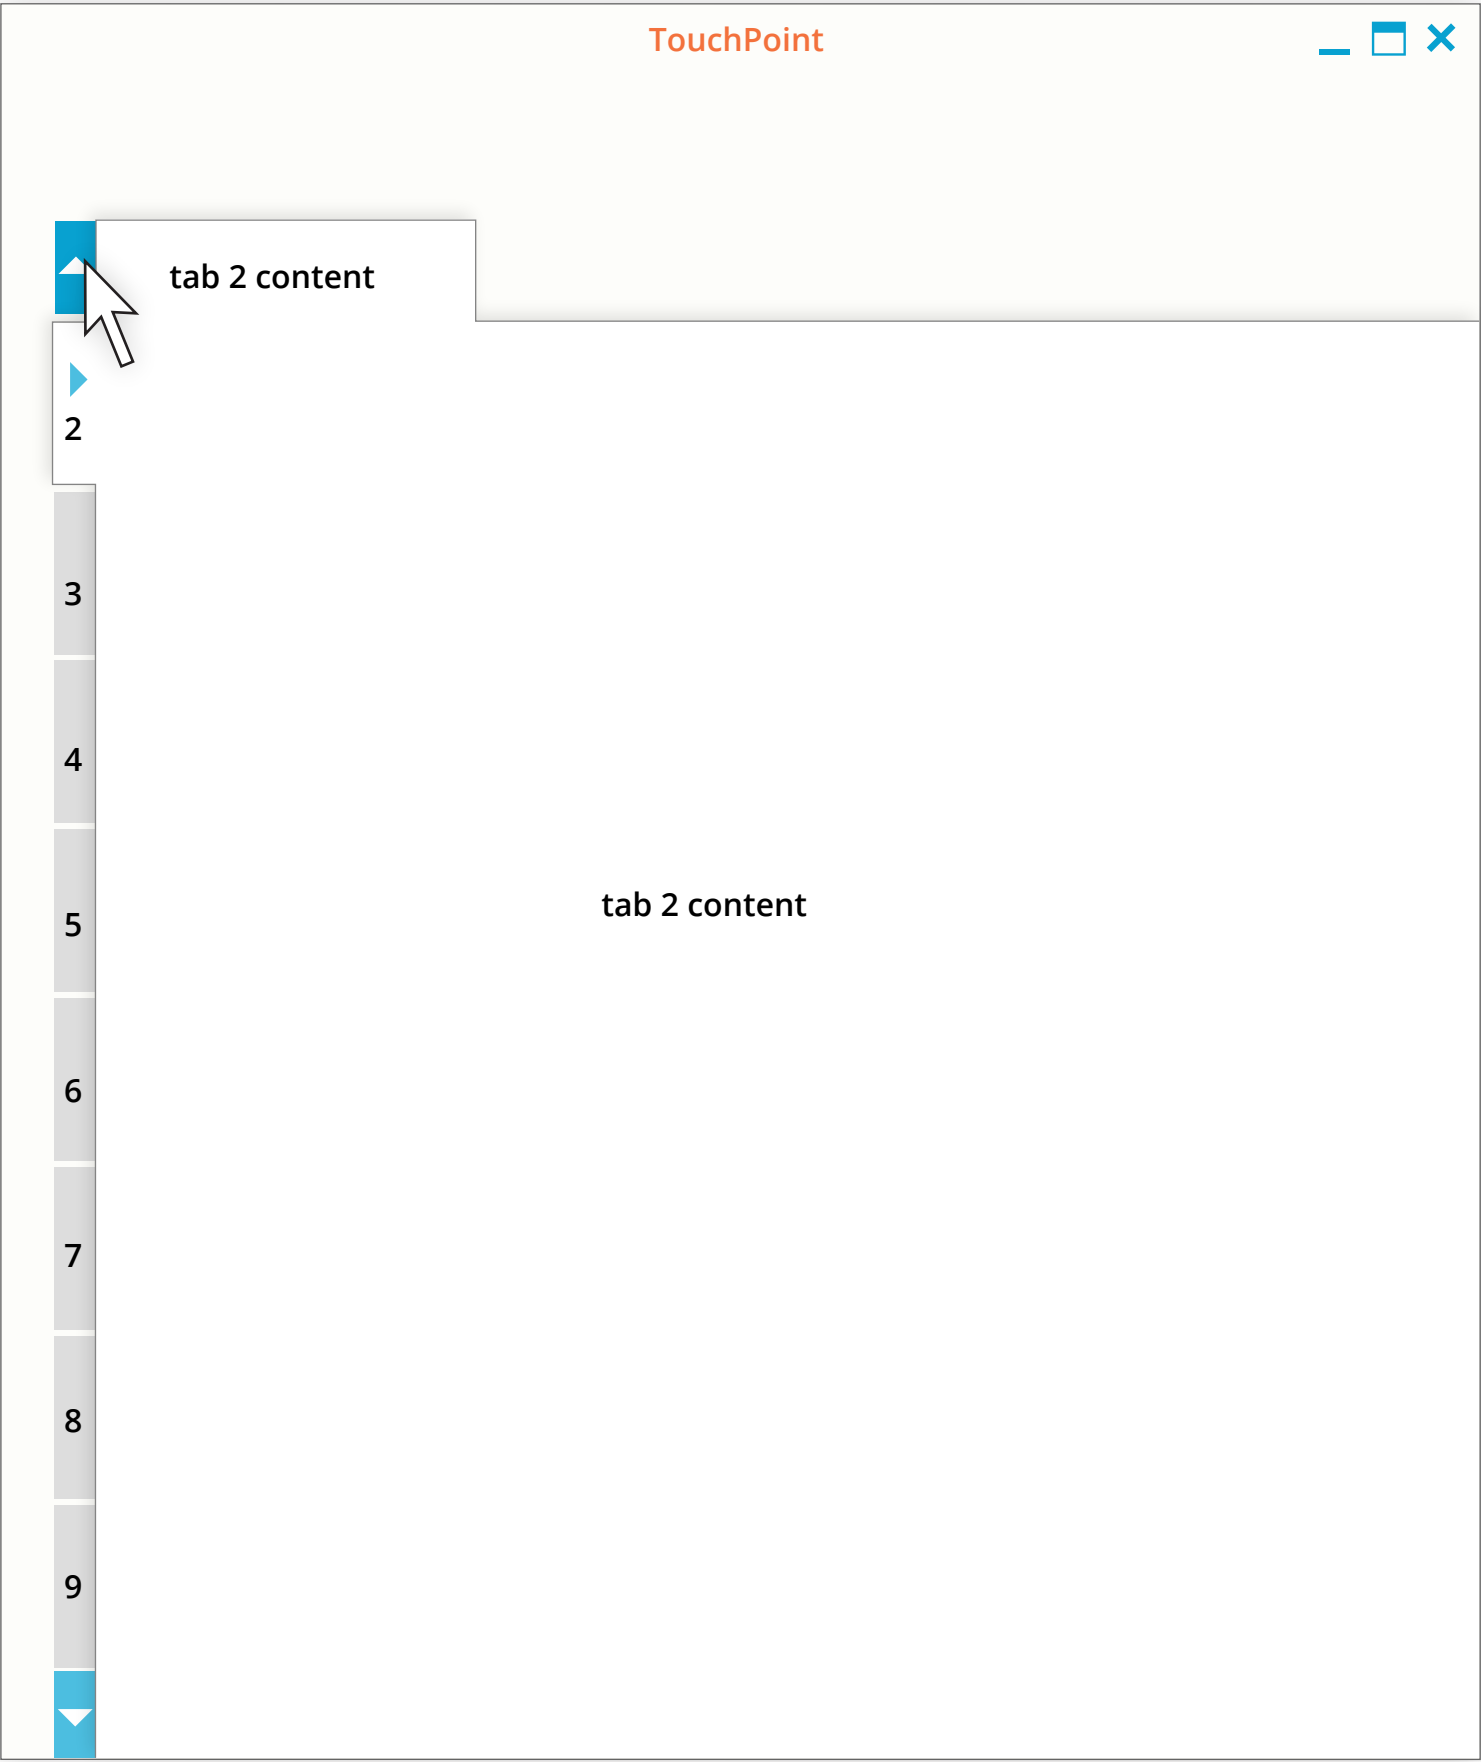

Clicking the Up Arrow will bring to focus the tab above the current selected tab.

The contents of the page will change to show content represented by the newly focussed tab

When the highlighted tab reaches the top, the tabs will start scrolling through, as per page 12.

When there are no more tabs to scroll through the arrow at the top will show as grey.
